

Bracelet Size Guide

Here's a way you can find your perfect size. Load normal letter-size paper in your computer's printer.

1. As you print this page, make sure you don't choose "fit to print" or similar command for it will create an inaccurate measure.
2. Once you've carefully cut out the ruler, wrap it around your wrist where you want the bracelet to rest and read the number where the ends overlap. Don't record a measurement that is too tight nor too loose.

Tip: Save this page to your hard drive. Close your Web browser and click on this file and it will automatically open Adobe Acrobat Reader. Print from that application.
